

My Counselling Process for Btech Admission

Plan:

First, I planned to check which are the top colleges/universities for joining the degree program.

Prepare:

Next, I checked on how much is the previous cut off rank of those colleges in order to secure a seat and what would be the college fee per semester.

Process:

If i get a seat, I thought of which branch/field to choose from the options (like Cse, IT, EEE etc....)

Analyze:

After that, I looked into their previous placement assistance or how many students have been placed and from which field most of the students secured a job.

Share:

After analyzing all the details, I discussed this with my family and friends for their inputs.

Act:

Then, I started opting out for the colleges in the Counselling process.
